amateurs without borders examines the rise of new actors in the international development world: volunteer driven grassroots international nongovernmental organizations. These small aid organizations, now ten thousand strong, sidestep the world of professionalized development aid by launching projects built around personal relationships and the skills of volunteers. This book draws on fieldwork in the United States and Africa, web data and IRS records to offer the first large scale systematic study of these groups. *amateurs without borders* investigates the aspirations and limits of personal compassion on a global scale.

Many volunteer workers have questioned their efforts and wondered if their actions truly made a difference. Questions about the state of the world, making a positive impact, health, safety, and creating authentic lasting change are at the heart of international volunteering. This book is a comprehensive guide for those who are currently volunteering or seeking to volunteer internationally. It demonstrates that with the right tools and knowledge, it is possible to make authentic lasting change. The book offers timely knowledge for volunteering in an era when the world has never been better off, but where current developments are not reaching everyone who still lives in poverty.

Torture, Intelligence, and Surveillance in the War on Terror examines the communication battles of the Bush and Blair political administrations and those of their successors in America and Britain over their use of torture, first hand or second hand, to gain intelligence for the war on terror. Exploring key agenda building drivers that exposed the torture intelligence nexus and presenting detailed case studies of key media events from the UK and USA, this insightful volume exposes dominant political discourses on the torture for intelligence policy, whether in the form of unauthorized leaks, official investigations, investigative journalism, real time reporting, or non governmental organisation activity. This timely study evaluates various modes of resistance to governments' attempts at strategic political communication, with particular attention to surveillance, community based recording, and first person perspectives. A rigorous exposition of the power/knowledge relationships constituting the torture intelligence nexus, which re-evaluates agenda building models in the digital age and assesses the strength of the public sphere across the third, fourth, and fifth estates, *Torture, Intelligence, and Surveillance in the War on Terror* will appeal to scholars across the social sciences with interests in media and communication, sociology, and social theory, politics, and political communication, international relations, and journalism.
